VIATEQ Corporation Acquires Achieve-it, LLC

McLean, VA – VIATEQ Corporation today announced they have acquired Achieve-it, LLC a provider of technology, finance, accounting and management solutions to Federal government, VA state and civilian agencies.

The acquisition expands and builds upon VIATEQ's U.S. federal services business through additional contract vehicles and access to federal government agencies that are core to VIATEQ's business model. Achieve-it's extensive experience with Cyber security, litigation support, IT support, accounting/finance and web services at the SEC, FAA and DOJ positions VIATEQ for even faster growth in the future by expanding customer reach and adding new capabilities.

"We believe the acquisition of Achieve-it will assist us in our long term strategy of growing our U.S. federal and security business. By offering our U.S. Federal customers a broader continuum of services from IT to business process management, we will be better positioned to meet increased demand for full-service providers at the federal level," said Lee Washington, President and CEO of VIATEQ Corporation.

The acquisition has been unanimously approved by the Boards of Directors for both companies.
